

# Submitting your article under your transformative/institutional open access agreement

A step by step guide

**IOP** Publishing

Not sure if your article type or chosen journal are covered by your transformative agreement? Go to <https://publishingsupport.iopscience.iop.org> and click on 'open access' and then 'transformative and open access agreements' to check the details of your agreement.

So, you're ready to start your submission.  
Follow steps 1-4 on our submission system; ScholarOne

## Start New Submission

To contact the journal team about a specific article please email [non@iopublishing.org](mailto:non@iopublishing.org), quoting the Manuscript ID.

Please read the [author guidelines](#) for more information on submitting your manuscript.

[Begin Submission](#)

# At step 4 you'll be asked to enter author information.

## Step 4: Author Information

Please enter information for **all\* co-authors**, ensuring names, emails and affiliations are accurate. **Changes to author lists after submission are only made in exceptional circumstances and are subject to approval by editorial staff.**

More advice and support [on adding author information](#) is available, including [who should be listed as a co-author](#), how to check if your co-author already has an account, and guidance for names with Chinese, Korean or Japanese characters.

Please do not share your login details with co-authors, who will receive their own login information if they do not already have accounts with the journal.

\*For papers with more than ten authors, please add information for the first ten authors.

\* = Required Fields

**Open Researcher and Contributor ID (ORCID)** is a non-profit organization dedicated to solving the long-standing name ambiguity problem in scholarly communication by creating a central registry of unique identifiers for individual researchers and an open, transparent linking mechanism between ORCID and other current author identifier schemes. To learn more about ORCID, please visit <http://orcid.org/content/initiative>

Create an ORCID iD

Associate your existing ORCID iD

As the corresponding (submitting) author you'll need to make sure your affiliation is clearly stated on the article itself, and on the submission form.

At step 6 you'll be asked for your open access choice.

You must select 'No' at this stage.

If your article is eligible under your institutional agreement, we will contact you to confirm this later.

N.B. we are currently reviewing this page to make it more intuitive. We hope to add an additional option to provide authors who know they are covered by Transformative Agreements with a clear choice.

### Open Access

This journal gives you the option to publish your article on a [gold open access basis](#) under a [CC BY licence](#).

### Why choose open access?

- Open access articles are accessible to subscribers and non-subscribers, maximising visibility.
- Open access articles are downloaded and cited more frequently than non-open access articles on average.
- Open access publication may enable you to comply with certain funder policies.

### Open Access Pricing

An article processing charge (APC) applies if you choose open access and your article is accepted for publication following independent peer review. We recommend that you ask your institution or funder if financial support is available for open access publication.

Authors based in countries categorised by the World Bank as low income can publish open access in this journal with no APC. Eligible low-income countries (Group A) are listed on this [page](#).

### Will my institution pay my fees?

We also have open access agreements with institutions and funders that may cover applicable APCs at no cost to you. Find out how to take advantage of these on [our publishing support pages](#).

### \* Do you wish to choose open access for your article?

Please supply the relevant detail to qualify for discounted rates.

Open Access Choice	Additional
<input checked="" type="radio"/> No, I do not wish to choose open access (your article will be accessible to subscribers only)	
<input type="radio"/> Yes: There is an <a href="#">article publication charge</a> for Open Access unless all authors are based in <a href="#">low-income countries</a> .	
<input type="radio"/> Yes, with <a href="#">reviewer discount</a> rate of 10% on article publication charges. Enter the ID of the IOP Publishing article you have reviewed.	<input type="text"/>

During the initial assessment of your article, we will identify if you may be eligible for funding to publish Open Access.

You'll receive an **email** to let you know you may be eligible for funding under an institutional agreement.

Funding via your library may be available

Visit [iopscience.org](https://iopscience.org) | [Read this e-mail online](#) | [Add us to your safe sender list](#)

Dear Example Salutation,

Re: "Example Article"

Article reference: Example Article Id

IOP Publishing, our publishing partner and your institution/funder have an open access agreement that promotes sustainable open access and may cover the article publication charge (APC) for your paper in *Example Journal*1.

The validating institution makes the final decision on whether an article receives open access funding. If the institution has no further funding available, or has reached their cap of articles, funding may be declined. In this case, we will inform you and give you the option to locate alternate funding or publish on a subscription basis (hybrid titles only).

Where any additional charges are payable for publication including, but not limited to, page charges, these remain payable by the Corresponding Author or Author's representative organisation.

If you do not want to publish your article open access, you will need to opt out prior to acceptance by notifying [openaccesscharging@iopublishing.org](mailto:openaccesscharging@iopublishing.org).

Visit our [Open Physics](#) website to learn more about the ways we are supporting open access to enable wider and faster access to physical sciences research.

#### Next steps

- We will contact the open access team at your institution/funder to approve funding once your article is accepted. Please ensure your institution/funder details are correctly acknowledged on the manuscript for validation.
- If your funding is approved, you will need to fill out a cc-by license (creative commons license) by choosing the Gold Open Access option when completing your Assignment of Copyright form.

You will be asked to sign an Open Access copyright form. If your institution approves funding, your article will be published Open Access under the terms of the institutional agreement.

If your funding is declined, your article will be published and available via a journal subscription
